

Täpsusta lehe suurust enne printimist. Veendu printimislehel, et leht oleks suunitud 100%-ni. (Sa saad avada selle valiku, vajutades klahve CTRL+P)

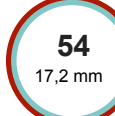

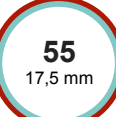

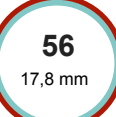

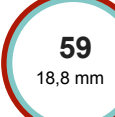

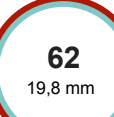

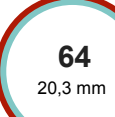

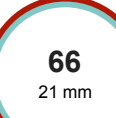

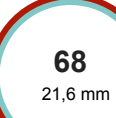

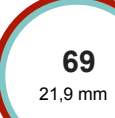

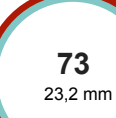

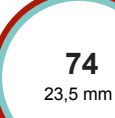

Mõõda kinnitusriba joonlauaga, et kinnitada täpsust. See peab olema 3 cm, 30 mm pikkune.

Mõõda oma olemasolevat sõrmust

Kui sul on sõrmus, mis sobib sulle täpselt sõrme, saad sa suuruse leida, asetades sõrmuse ühele allolevatele rõngastele. Kui asetad sõrmuse, veendu, et klapitaksid siseääri (sinine ring) ilma ühegi vaheta. Punast ringi ei tohiks näha, kui sõrmust vaadata vertikaalselt ülalpoolt. Kui sõrmus jääb kahe suuruse vahele, soovitame tellida suurema suuruse.

Sa saad sia asetada krediitkaardi, et kinnitada täpsust.
